HAMMAD AHSAN

FULL STACK DEVELOPER | REACT.JS · NEXT.JS · NODE.JS · NESTJS

Islamabad, Pakistan | +92 336 5290121 | Email | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 4.5 years of professional experience designing and developing scalable web applications and backend services. Proficient in React.js, Next.js, Node.js, NestJS, RESTful APIs, state management, SQL and NoSQL databases, AI integrations, and cloud deployments. Experienced in delivering end-to-end solutions across SaaS, automation, e-commerce, and business operations platforms.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Redux Toolkit, RTK Query, CSS3, SCSS, Tailwind CSS, Material UI, PrimeReact, shadcn/ui, Ant Design, Chart.js.

Backend: Node.js, Express.js, NestJS, REST APIs, JWT, Socket.io, Cron Jobs, FCM Token, Twilio, Payment Gateways Integration, Google OAuth, CRM Integration, Hardware Integrations.

Databases: MongoDB, PostgreSQL, MySQL, Supabase

AI Technologies: Generative AI, AI Agents, Vapi AI, OpenAI, LLMs, Prompt Engineering, Workflow Automation.

Tools & Deployment: Git, GitHub, GitLab, AWS, Azure, Heroku, Vercel, Netlify, Firebase

PROFESSIONAL EXPERIENCE

Full Stack Developer | eSquall LLC, Rawalpindi | May 2025 – Present

- Lead and coordinate the development team, oversee technical implementation, assign tasks, conduct code reviews, and ensure timely delivery of project milestones.
- Design, develop, and maintain scalable, responsive web applications using React.js, Next.js, TypeScript, Material UI, PrimeReact, shadcn/ui, Tailwind CSS, and other modern UI libraries.
- Develop and integrate RESTful APIs, AI-powered features, and third-party services, leveraging Axios, Redux Toolkit, and RTK Query for efficient data fetching and state management.
- Integrate AI-powered features using OpenAI, Anthropic Claude, Google Gemini APIs, and the LangChain framework.
- Build and maintain full-stack applications using Node.js, Next.js, MongoDB, PostgreSQL, and MySQL, ensuring clean architecture, maintainability, and application performance.
- Take ownership of application deployments, production environments, server access, and release management, managing deployment configurations, troubleshooting production issues, and ensuring application stability.
- Manage Git workflows, repositories, branch management, and code integration, while collaborating with developers to maintain code quality and smooth development cycles.

MERN Developer | App In Snap, Islamabad | Aug 2022 – Apr 2025

- Developed and maintained scalable, responsive web applications using React.js, JavaScript, Redux Toolkit, and modern frontend technologies.
- Integrated RESTful APIs using Axios and Fetch API, ensuring seamless communication between frontend and backend services.
- Developed backend services using Node.js, Express.js, and MongoDB, implementing JWT-based authentication, authorization, and secure API integrations.
- Developed real-time features using Socket.IO and SignalR, integrated hardware systems, and implemented complex business workflows to ensure reliable communication between applications and external systems.

FEATURED PROJECTS

Leadelta | Project Link

AI-powered lead management platform with admin/client portals, inbound/outbound voice and SMS agents using Vapi AI and Twilio, automated bookings, HubSpot CRM integration, and workflow automation.

PRM AI | Project Link

Chauffeur booking and management platform supporting staff bookings, Google Forms, SMS and email integrations, with a driver app for real-time GPS tracking and trip management.

ZiggleBee | Project Link

Accessibility-focused platform featuring admin/owner portals, Stripe subscriptions, role-based feature access, and a customizable template builder for accessible content.

Adfy | Project Link

AI-powered real estate platform featuring document analysis, compliance checks, and a configurable workflow builder automating approvals, task management, and document reviews.

Playli | Project Link

Sports community platform connecting local athletes through nearby player discovery, game participation, join open games and organize their own sports activities. The main purpose is to bring everyday athletes together, making it easier to organize games and build a local sports community

HomeSuite | Project Link

Commission-free real estate marketplace featuring property listings, advanced search filters, location-based recommendations, and integrated home services.

Mariachify | Project Link

A Mexican-based project that uses AI to generate personalized greeting videos and other custom content for users. The system handles user requests, content generation, and delivery through an intuitive admin and client interface.

UltraMarble | Project Link

A job-driven workflow where work orders are created and customized for marble and related products. It builds full visualizations with dimensions and product features, renders marble layouts, and assigns tasks to team staff.

GenZen | Project Link

Healthcare records platform for prescriptions, labs and diagnostic documents. It leverages AI to analyze patient data, summarize medical history, identify potential health concerns, recommend precautions, and provide personalized care insights

360 Suite Business | Project Link

Marketing dashboard integrating Google, Snapchat, Pinterest, Facebook and X for advertising management, track performance and real-time campaign reporting.

Tektime | Project Link

A ready-to-use AI solution designed to help freelancers and small to medium-sized business owners save time and manage their operations by creating meeting agendas, daily timelines, discussion roadmaps, and solutions, with seamless Microsoft integration.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Foundation University Rawalpindi Campus | 2018–2022
